No refunds after April 1, 2021

Conference Information

Saturday, April 10, 2021
Virtual (Online) Conference

10:00 AM to 3:45 PM CDT

Featuring

CeCe Moore

“THE DNA DETECTIVE”

Autosomal DNA Theory: The Dos and Don'ts
of Genetic Genealogy

Resolving Parentage Mysteries with DNA
Genetic Genealogy Case Studies

Real Life Cases from the Desk of a DNA
Detective

We can now accept conference payment and dues
via PayPal. Just fill in the email associated with
your PayPal acct and we will send you an invoice.

soon: GOGSNE.org

SCHEDULE

10:00 AM to 10:30 AM – Announcements &
Door Prize drawings (must be present to win)

10:30 AM to 11:30 AM - Autosomal DNA
Theory: The Dos and Don'ts of Genetic
Genealogy - company algorithms, what constitutes
genetic evidence This session will focus on
understanding key concepts necessary to go to the
next level with autosomal DNA research. This will
include the scope of atDNA and realistic expectations
of the depth of coverage, randomness of inheritance,
expected percentages versus observed ranges, and the
pros and cons of segment triangulation.

11:45 AM to 12:45 PM - Resolving Unknown
Parentage Mysteries with DNA Adoptees and
other individuals without knowledge of their
genealogy are enjoying significant success using DNA
testing to discover their roots. Techniques used in this
quest will be explained and explored through case
studies.

12:45 PM to 1:30 PM - Break for lunch

1:30 PM to 2:30 PM - Genetic Genealogy Case
Studies Step-by-step case studies demonstrate the use
of all four types of DNA in conjunction with traditional
research to solve genealogical mysteries and showcase
the exciting possibilities this work offers.

2:45 PM to 3:45 PM - Real Life Cases from the
Desk of a DNA Detective - DNA testing is
revealing unexpected surprises in the family trees of
many individuals, involving both immediate and more
distant ancestors. These surprises often lead to
fascinating stories that could never have been
unearthed without DNA and this newfound
knowledge has taught us that our family trees on
paper may not always be the same as our true genetic
genealogy. After learning of its potential to reveal and
unravel complex family relationships, many are
flocking to DNA testing to solve their own family
mysteries. We will explore the research behind some
of CeCe's high profile cases, including law
enforcement applications.

CeCe Moore

The DNA Detective

CeCe Moore is an investigative genetic genealogist and media consultant. She has been a core production member as the full-time genetic genealogist of the PBS Television documentary series *Finding Your Roots with Henry Louis Gates, Jr.* continually since 2013, and as a producer in Season Five (2019). CeCe is the founder of *The DNA Detectives*, with an online following of over 130,000 people. She joined forces with Parabon Nanolabs in May 2018 to create and lead their Genetic Genealogy Services for law enforcement unit, boasting the unparalleled record of over one hundred successful identifications in the first 22 months alone. Her work has led to the first conviction, the first conviction through jury verdict, and the first exoneration in criminal cases where the suspect was identified through investigative genetic genealogy.

As a leading proponent of genetic genealogy education, CeCe is the co-founder of the *Institute for Genetic Genealogy* and has written the popular blog *Your Genetic Genealogist* since 2010. She has taken a leadership role in creating educational resources for the genetic genealogy community and was co-chair of the genetic genealogy standards committee, helping to create and teach the groundbreaking first genetic genealogy courses at the premier genealogical institutes, including Genealogical Research Institute of Pittsburgh, Salt Lake Institute of Genealogy, Institute of Genealogy and Historical Research and Forensic Genealogy Institute. CeCe organized the *Institute for Genetic Genealogy* conferences, held in Washington, D.C. in 2014, San Diego, CA in

2016, 2017 and 2018, and Las Vegas, NV in 2020. She created and runs the largest educational online DNA-focused forum, the *DNA Detectives* Facebook group with over 150,000 members, as well as administering many other genetic genealogy online groups, forums and mailing lists.

She works extensively on a pro-bono basis with individuals of unknown parentage to help them learn about their genetic heritage, reuniting thousands with biological family members. Notably, CeCe led the research teams that solved the high profile cases involving amnesiac Benjamin Kyle and founding Paul Fronczak. CeCe is a Southern California native and attended the University of Southern California, studying on a full scholarship. Prior to her involvement in genetic genealogy, CeCe had been active in the entertainment industry for over two decades, performing leading roles in professional musical theatre such as *West Side Story* and *Phantom* and appearing in numerous television commercials, as well as producing and casting many advertising campaigns for broadcast. A longtime member of Screen Actors Guild (1993), CeCe has worked with celebrated director Francis Ford Coppola, Superstar Michael Jackson, actor and musician Jack Black, conductor Bill Conti, Mickey Rourke, Dennis Hopper, John Ratzenberger, Juliet Prowse, David Lynch, John Stamos, Carol Alt, Daniela Pestova, Dick Van Patten, Ed McMahon, and represented corporate giants such as Coca Cola, AT&T, Porsche, American Express and Mattel. She is also a member of Mensa.

CeCe is the proud mom of a very talented fifteen year-old boy who loves genetic genealogy almost as much as she does.
